Reference: Rhode Island Hospital Main Building Switchgear Replacement

Dear Dave,

I have mentioned this to you in passing, but wanted to also document for the record that I and others involved in the above referenced project felt that the team you assigned (Al Marchand, Eddie and Cory) did an outstanding job in bringing that very difficult project to completion. It was a pleasure working with those individuals, as well as you and your firm, over an extended period of time.

There were a minimum of problems, if any, due to the actions of your field personnel and the foresight, and the quality of workmanship which Al brought to this and related projects were highly commendable. The end result, as we now look at the space, is a very positive testament to the whole team's efforts.

Please pass a copy of this letter on to Al, Ed and Cory.

Respectfully,

  
Jack W. Dean, P.E.
